

# *Inner Sound (Abstract)*

Jordan Dykstra

---

A very loud sound in the distance,  
a very soft sound nearby,  
nuances of inner sound.

There are those who say that logic  
is a straight line.  
I say, let logic be  
full circle of the self,  
expanding slowly as the deep red tint  
of the overshadowed moon reveals  
more and more nuances  
of inner sound.
